COMPLETE GUIDE

# Wall Pilates
# 21-Day Challenge

The day-by-day 21-day plan and the library with every exercise explained step by step.

WALL PILATES · 21-DAY CHALLENGE

# Welcome to your Challenge

For 21 days you'll work out a few minutes a day using just a wall and a mat. The workouts are organized into **3 phases**, starting with breathing and mobility and ending with strength, balance and a new posture. This guide has the full plan and an explanation of every exercise.

> **How to use this guide**
>
> Follow one day at a time, in order. Do the **warm-up**, the **main workout** and the **cool-down**. When you see "2 x 10", do 2 sets of 10 reps, resting for the time shown. If you're unsure about an exercise, look up its name in the **Library** at the end of the guide.

# Before you start

- About 6 feet of space next to a clear wall, with no pictures or outlets in the way.
- A yoga mat or a folded towel.
- Comfortable clothes and bare feet or non-slip socks.
- A water bottle nearby.
- Always breathe: exhale at the hardest part of the move.

# The 3 phases

| Phase | Days | What happens |
|---|---|---|
| **Wake Up Your Body** | 1 to 7 | Breathing, mobility, posture and your first muscles waking up. |
| **Activate Your Strength** | 8 to 14 | Stronger abs, glutes and legs, with stability and control. |
| **Your Best Self** | 15 to 21 | Lock in your moves, flexibility and balance — and celebrate. |

PHASE 1

# Wake Up Your Body

Breathing, mobility, posture and your first muscles waking up.

DAY 1 **First Contact**

Get to know the wall as your support and feel your deep core for the first time.

**WARM-UP**

| | |
|---|---|
| Lateral breathing against the wall | 60 s |
| Standing cat-cow at the wall | 8 reps |
| Hip circles with wall support | 8 reps |

**MAIN WORKOUT**

| | |
|---|---|
| Pelvic tilt with feet on the wall | 2 x 10 · rest 20 s |
| Bridge with feet on the wall | 2 x 8 · rest 30 s |
| Wall angels | 2 x 8 · rest 20 s |
| Wall calf raises | 2 x 10 · rest 20 s |

**COOL-DOWN**

| | |
|---|---|
| Legs up the wall | 60 s |
| Wall chest stretch | 30 s (per side) |

💗 *Today there's no right or wrong: there's just starting. Let's go slowly and mindfully.*

## DAY 2 Breathe and Align

Mobilize your spine and start supporting your body with your core.

**WARM-UP**

| | |
|---|---|
| Lateral breathing against the wall | 60 s |
| Wall-supported march | 40 s |

**MAIN WORKOUT**

| | |
|---|---|
| Wall roll-down | 2 x 5 · rest 20 s |
| Incline wall plank | 2 x 20 s · rest 25 s |
| Standing hip abduction at the wall | 2 x 8 (per side) · rest 20 s |
| Alternating toe taps (feet on the wall) | 2 x 8 · rest 20 s |

**COOL-DOWN**

| | |
|---|---|
| Figure-4 stretch with foot on the wall | 30 s (per side) |
| Wall-supported side bend | 20 s (per side) |

💗 *Your body already remembers yesterday. Today we'll give it a little more movement.*

## DAY 3 Active Core

Learn to keep your lower back stable while your arms and legs move.

**WARM-UP**

| | |
|---|---|
| Standing cat-cow at the wall | 8 reps |
| Wall ankle mobility | 8 reps (per side) |

**MAIN WORKOUT**

| | |
|---|---|
| Pelvic tilt with feet on the wall | 1 x 12 · rest 15 s |
| Dead bug pressing into the wall | 2 x 6 · rest 25 s |
| Bridge with feet on the wall | 2 x 10 · rest 30 s |
| Wall push-up | 2 x 8 · rest 30 s |

**COOL-DOWN**

| | |
|---|---|
| Butterfly with legs on the wall | 60 s |
| Wall chest stretch | 30 s (per side) |

💗 *Three days in a row of self-care! Today you earn your first medal.*

## DAY 4 Gentle Mobility

A lighter day: bring movement back to your joints and let your muscles recover.

**WARM-UP**

| | |
|---|---|
| Lateral breathing against the wall | 60 s |

**MAIN WORKOUT**

| | |
|---|---|
| Wall thoracic rotation | 1 x 6 (per side) · rest 10 s |
| Hip circles with wall support | 1 x 10 · rest 10 s |
| Standing chest opener (wall swan) | 1 x 6 · rest 10 s |
| Wall ankle mobility | 1 x 8 (per side) · rest 10 s |
| Wall angels | 1 x 8 · rest 10 s |

**COOL-DOWN**

| | |
|---|---|
| Legs up the wall | 90 s |
| Hamstring stretch with leg on the wall | 30 s (per side) |

💗 *Rest is training too. Today your body will thank you for the gentle movement.*

## DAY 5 Solid Foundation

Strengthen your glutes and legs and hold your plank longer.

**WARM-UP**

| | |
|---|---|
| Wall-supported march | 45 s |
| Lateral breathing against the wall | 45 s |

**MAIN WORKOUT**

| | |
|---|---|
| Marching bridge on the wall | 2 x 10 · rest 30 s |
| Wall sit | 2 x 20 s · rest 30 s |
| Standing hip extension at the wall | 2 x 8 (per side) · rest 20 s |
| Incline wall plank | 2 x 25 s · rest 25 s |

**COOL-DOWN**

| | |
|---|---|
| Wall-supported quad stretch | 30 s (per side) |
| Wall calf stretch | 30 s (per side) |

💗 *Five days! When you finish today, a bonus mobility class unlocks for you.*

## DAY 6 Queen Posture

Open your chest, strengthen your back and train your balance.

**WARM-UP**

| | |
|---|---|
| Wall roll-down | 5 reps |
| Standing cat-cow at the wall | 8 reps |

**MAIN WORKOUT**

| | |
|---|---|
| Wall angels | 2 x 10 · rest 20 s |
| Standing chest opener (wall swan) | 2 x 8 · rest 20 s |
| Wall push-up | 2 x 10 · rest 30 s |
| Single-leg balance with wall support | 2 x 20 s (per side) · rest 15 s |

**COOL-DOWN**

| | |
|---|---|
| Wall-supported side bend | 25 s (per side) |
| Wall chest stretch | 30 s (per side) |

💗 *Today you'll grow a few inches… in posture! Shoulders away from your ears.*

## DAY 7 Week 1 Wrap-Up

Bring together everything you learned this week in one flowing sequence.

**WARM-UP**

| | |
|---|---|
| Lateral breathing against the wall | 60 s |
| Hip circles with wall support | 8 reps |

**MAIN WORKOUT**

| | |
|---|---|
| Bridge with feet on the wall | 2 x 12 · rest 25 s |
| Standing hip abduction at the wall | 2 x 10 (per side) · rest 20 s |
| Incline wall plank | 2 x 30 s · rest 25 s |
| Dead bug pressing into the wall | 2 x 8 · rest 25 s |
| Wall angels | 1 x 10 · rest 15 s |

**COOL-DOWN**

| | |
|---|---|
| Legs up the wall | 90 s |

💗 *A whole week! Today is the day to notice how far you've already come.*

PHASE 2

# Activate Your Strength

Stronger abs, glutes and legs, with stability and control.

## DAY 8 Strength Awakens

Step into the strength phase with glutes, legs and your first Hundred.

### WARM-UP

| | |
|---|---|
| Wall-supported march | 45 s |
| Standing cat-cow at the wall | 8 reps |

### MAIN WORKOUT

| | |
|---|---|
| Marching bridge on the wall | 2 x 12 · rest 30 s |
| Wall slide squat | 2 x 10 · rest 30 s |
| Prep hundred with feet on the wall | 2 x 30 s · rest 30 s |
| Standing hip abduction at the wall | 2 x 12 (per side) · rest 20 s |

### COOL-DOWN

| | |
|---|---|
| Figure-4 stretch with foot on the wall | 30 s (per side) |
| Hamstring stretch with leg on the wall | 30 s (per side) |

💗 *Welcome to Phase 2! Your body is ready for a bit more challenge.*

## DAY 9 Abs in Focus

Work your deep core in four different ways.

**WARM-UP**

| | |
|---|---|
| Lateral breathing against the wall | 60 s |
| Pelvic tilt with feet on the wall | 10 reps |

**MAIN WORKOUT**

| | |
|---|---|
| Prep hundred with feet on the wall | 2 x 40 s · rest 30 s |
| Alternating toe taps (feet on the wall) | 2 x 10 · rest 20 s |
| Dead bug pressing into the wall | 2 x 8 · rest 25 s |
| Incline wall plank | 2 x 30 s · rest 25 s |

**COOL-DOWN**

| | |
|---|---|
| Legs up the wall | 60 s |
| Butterfly with legs on the wall | 60 s |

💗 *Today your core is the star. Quality beats speed.*

## DAY 10 Glutes in Action

Strengthen your glutes from different angles for stable hips.

**WARM-UP**

| | |
|---|---|
| Hip circles with wall support | 10 reps |
| Wall ankle mobility | 8 reps (per side) |

**MAIN WORKOUT**

| | |
|---|---|
| Bridge with feet on the wall | 2 x 15 · rest 30 s |
| Clamshell with feet on the wall | 2 x 12 (per side) · rest 20 s |
| Standing hip extension at the wall | 2 x 10 (per side) · rest 20 s |
| Wall sit | 2 x 30 s · rest 30 s |

**COOL-DOWN**

| | |
|---|---|
| Figure-4 stretch with foot on the wall | 40 s (per side) |
| Wall-supported quad stretch | 30 s (per side) |

💗 *Day 10! Today you unlock a special relaxation session. You deserve it.*

## DAY 11 Breathe and Recover

Active recovery: release the muscles you've worked and calm your nervous system.

**WARM-UP**

| | |
|---|---|
| Lateral breathing against the wall | 90 s |

**MAIN WORKOUT**

| | |
|---|---|
| Standing cat-cow at the wall | 1 x 10 · rest 10 s |
| Wall thoracic rotation | 1 x 6 (per side) · rest 10 s |
| Hip circles with wall support | 1 x 8 · rest 10 s |

**COOL-DOWN**

| | |
|---|---|
| Legs up the wall | 120 s |
| Butterfly with legs on the wall | 90 s |
| Hamstring stretch with leg on the wall | 40 s (per side) |

💗 *After strong days, a day of care. This is where your body rebuilds.*

## DAY 12 Total Stability

Train your body to stay steady on smaller bases of support.

**WARM-UP**

| | |
|---|---|
| Wall-supported march | 45 s |
| Wall angels | 8 reps |

**MAIN WORKOUT**

| | |
|---|---|
| Incline side plank on the wall | 2 x 20 s (per side) · rest 20 s |
| Single-leg balance with wall support | 2 x 30 s (per side) · rest 15 s |
| Incline wall mountain climber | 2 x 20 · rest 30 s |
| Single-leg wall bridge | 2 x 6 (per side) · rest 25 s |

**COOL-DOWN**

| | |
|---|---|
| Wall-supported side bend | 25 s (per side) |
| Wall calf stretch | 30 s (per side) |

💗 *Balance is focus training. Keeping your eyes on a fixed point helps a lot!*

## DAY 13 Strong Legs

Strengthen your thighs, glutes and calves with control.

**WARM-UP**

| | |
|---|---|
| Wall ankle mobility | 8 reps (per side) |
| Wall-supported march | 45 s |

**MAIN WORKOUT**

| | |
|---|---|
| Wall-supported split squat | 2 x 8 (per side) · rest 30 s |
| Wall slide squat | 2 x 12 · rest 30 s |
| Wall calf raises | 2 x 15 · rest 20 s |
| Standing hip abduction at the wall | 2 x 12 (per side) · rest 20 s |

**COOL-DOWN**

| | |
|---|---|
| Wall-supported quad stretch | 30 s (per side) |
| Wall calf stretch | 30 s (per side) |
| Hamstring stretch with leg on the wall | 30 s (per side) |

💗 *Strong legs carry you everywhere. Today is all about them!*

## DAY 14 Control and Power

A strength circuit that wraps up Phase 2 and shows your progress.

**WARM-UP**

| | |
|---|---|
| Lateral breathing against the wall | 45 s |
| Standing cat-cow at the wall | 8 reps |
| Hip circles with wall support | 8 reps |

**MAIN WORKOUT**

| | |
|---|---|
| Prep hundred with feet on the wall | 2 x 50 s · rest 25 s |
| Marching bridge on the wall | 2 x 14 · rest 25 s |
| Wall push-up | 2 x 12 · rest 25 s |
| Incline wall plank | 2 x 40 s · rest 25 s |
| Wall leg slides | 2 x 8 · rest 20 s |

**COOL-DOWN**

| | |
|---|---|
| Legs up the wall | 90 s |

💗 *Two weeks! You're proving to yourself that you can do it. Medal incoming!*

PHASE 3

# Your Best Self

Lock in your moves, flexibility and balance — and celebrate.

## DAY 15 Mindful Flow

Link movements together smoothly, like a full Pilates class.

### WARM-UP

| | |
|---|---|
| Wall roll-down | **6 reps** |
| Wall thoracic rotation | **5 reps (per side)** |

### MAIN WORKOUT

| | |
|---|---|
| Bridge with feet on the wall | **2 x 15 · rest 20 s** |
| Dead bug pressing into the wall | **2 x 10 · rest 20 s** |
| Wall angels | **2 x 12 · rest 15 s** |
| Standing hip abduction at the wall | **2 x 15 (per side) · rest 15 s** |
| Standing chest opener (wall swan) | **1 x 8 · rest 15 s** |

### COOL-DOWN

| | |
|---|---|
| Butterfly with legs on the wall | **60 s** |
| Figure-4 stretch with foot on the wall | **40 s (per side)** |

💗 *Phase 3! You know the moves now. Today is about doing them with grace.*

## DAY 16 Integrated Core

Abs working together with your hips and shoulders.

**WARM-UP**

| | |
|---|---|
| Lateral breathing against the wall | 45 s |
| Pelvic tilt with feet on the wall | 10 reps |

**MAIN WORKOUT**

| | |
|---|---|
| Prep hundred with feet on the wall | 1 x 60 s · rest 30 s |
| Leg circles with foot on the wall | 2 x 8 (per side) · rest 20 s |
| Alternating toe taps (feet on the wall) | 2 x 12 · rest 20 s |
| Incline side plank on the wall | 2 x 25 s (per side) · rest 20 s |
| Incline wall mountain climber | 2 x 24 · rest 25 s |

**COOL-DOWN**

| | |
|---|---|
| Legs up the wall | 60 s |
| Wall-supported side bend | 25 s (per side) |

💗 *Your core is stronger than in week 1. Today you'll feel it!*

## DAY 17 Living Flexibility

Gain range of motion with sustained stretches and mobility.

**WARM-UP**

| | |
|---|---|
| Wall thoracic rotation | 6 reps (per side) |
| Hip circles with wall support | 10 reps |

**MAIN WORKOUT**

| | |
|---|---|
| Standing chest opener (wall swan) | 1 x 8 · rest 10 s |
| Hamstring stretch with leg on the wall | 1 x 45 s (per side) · rest 10 s |
| Wall-supported quad stretch | 1 x 30 s (per side) · rest 10 s |
| Figure-4 stretch with foot on the wall | 1 x 45 s (per side) · rest 10 s |

**COOL-DOWN**

| | |
|---|---|
| Butterfly with legs on the wall | 90 s |
| Legs up the wall | 60 s |

💗 *Day 17: stretching is a gift to your body. And today another bonus class unlocks!*

## DAY 18 Balance and Lightness

Combine balance and strength on a single leg.

### WARM-UP

| | |
|---|---|
| Wall-supported march | 45 s |
| Wall ankle mobility | 8 reps (per side) |

### MAIN WORKOUT

| | |
|---|---|
| Single-leg balance with wall support | 2 x 40 s (per side) · rest 15 s |
| Single-leg wall bridge | 2 x 8 (per side) · rest 25 s |
| Wall-supported split squat | 2 x 10 (per side) · rest 30 s |
| Clamshell with feet on the wall | 2 x 15 (per side) · rest 20 s |
| Wall calf raises | 1 x 20 · rest 15 s |

### COOL-DOWN

| | |
|---|---|
| Wall calf stretch | 30 s (per side) |
| Wall-supported quad stretch | 30 s (per side) |

💗 *Lightness is strength with control. Use the wall whenever you want.*

DAY 19

## Total-Body Strength

The most complete workout of the challenge: your whole body working.

### WARM-UP

| | |
|---|---|
| Lateral breathing against the wall | **45 s** |
| Wall-supported march | **45 s** |
| Wall angels | **8 reps** |

### MAIN WORKOUT

| | |
|---|---|
| Wall sit | **2 x 40 s · rest 30 s** |
| Wall push-up | **2 x 14 · rest 30 s** |
| Marching bridge on the wall | **2 x 16 · rest 25 s** |
| Incline wall plank | **2 x 45 s · rest 25 s** |
| Standing hip abduction at the wall | **2 x 15 (per side) · rest 20 s** |

### COOL-DOWN

| | |
|---|---|
| Legs up the wall | **60 s** |
| Wall chest stretch | **30 s (per side)** |

💗 *This is the most complete workout of the challenge. Go at your own pace and celebrate every set.*

DAY 20

## Your Best Posture

A strong back, open chest and firm core to carry into everyday life.

### WARM-UP

| | |
|---|---|
| Standing cat-cow at the wall | 8 reps |
| Wall thoracic rotation | 5 reps (per side) |

### MAIN WORKOUT

| | |
|---|---|
| Wall angels | 2 x 12 · rest 15 s |
| Standing chest opener (wall swan) | 2 x 10 · rest 15 s |
| Incline side plank on the wall | 2 x 30 s (per side) · rest 20 s |
| Dead bug pressing into the wall | 2 x 10 · rest 20 s |
| Wall roll-down | 1 x 6 · rest 15 s |

### COOL-DOWN

| | |
|---|---|
| Wall chest stretch | 30 s (per side) |
| Wall-supported side bend | 25 s (per side) |

💗 *Tomorrow is the big day! Today let's polish the posture you've built.*

DAY 21

## Journey Celebration

Revisit your favorite moves and see how far you've come.

### WARM-UP

| | |
|---|---|
| Lateral breathing against the wall | 60 s |
| Wall roll-down | 6 reps |

### MAIN WORKOUT

| | |
|---|---|
| Bridge with feet on the wall | 1 x 15 · rest 20 s |
| Prep hundred with feet on the wall | 1 x 60 s · rest 25 s |
| Wall sit | 1 x 45 s · rest 25 s |
| Wall angels | 1 x 12 · rest 15 s |
| Incline wall plank | 1 x 45 s · rest 20 s |
| Single-leg balance with wall support | 1 x 30 s (per side) · rest 15 s |

### COOL-DOWN

| | |
|---|---|
| Legs up the wall | 120 s |
| Butterfly with legs on the wall | 60 s |

💗 *Day 21. You made it! This workout is a tribute to every day you didn't give up.*

# Exercise library

Every exercise in the challenge, organized by type. Read through them before your first workout.

## Breathing

### Lateral breathing against the wall

Diaphragm | Intercostals | Transverse abdominis

**Position:** Sitting on the mat, back against the wall, legs crossed or extended.

1. Rest your whole back on the wall and lengthen the crown of your head toward the ceiling.
2. Place your hands on the sides of your ribs.
3. Breathe in through your nose, expanding your ribs sideways into your hands.
4. Breathe out slowly through your mouth, feeling your belly button draw toward your spine.

**Breathing:** Inhale for 4 counts, exhale for 6 counts. The exhale is always longer.

**Avoid:** Lifting your shoulders as you inhale. Pushing out only your belly instead of opening your ribs.

**Easier version:** Do it sitting in a chair with your back against the wall.

**Safety:** If you feel dizzy, go back to breathing normally for a few cycles.

## Mobility

### Wall roll-down

Spinal erectors | Abs | Hamstrings

**Position:** Standing, back against the wall, heels a hand-width from the wall, knees slightly soft.

1. Press your hips, back and head against the wall.
2. Bring your chin to your chest and roll your spine forward, one vertebra at a time.
3. Go down as far as is comfortable, arms relaxed and hips still on the wall.
4. Roll back up from the bottom, placing each vertebra back on the wall.

**Breathing:** Exhale as you roll down, inhale at the bottom, exhale as you roll up.

**Avoid:** Taking your hips off the wall. Dropping down all at once without moving through your spine.

**Easier version:** Bend your knees more and only go down to chest height.

**Safety:** With lower back pain or uncontrolled high blood pressure, go down only a little and come up slowly.

**Pain or limitations in your lower back?** Swap for: Pelvic tilt with feet on the wall.

## Wall angels

Middle and lower trapezius | Rhomboids | Chest (stretch)

**Position:** Standing, back against the wall, feet one step forward, knees slightly bent.

1. Press your hips, back and, if possible, your head against the wall.
2. Bend your elbows to 90° with your arms and backs of your hands on the wall, making a "W".
3. Slide your arms up without losing contact with the wall.
4. Slide back down to the "W", squeezing your shoulder blades together.

**Breathing:** Inhale as your arms go up, exhale as they come down.

**Avoid:** Arching your lower back to keep your arms on the wall. Shrugging your shoulders toward your ears.

**Easier version:** Move your arms a few inches off the wall and reduce the range.

**Safety:** Stop if you feel tingling in your arms or shoulder pain.

**Pain or limitations in your shoulders?** Swap for: Wall chest stretch.

## Standing cat-cow at the wall

Upper and lower spine | Abs | Chest

**Position:** Standing, facing the wall, hands on it at shoulder height, one step back.

1. Feet hip-width apart, knees slightly bent.
2. Round your back, drawing your belly button in and looking toward it (cat).
3. Then open your chest, bringing your breastbone toward the wall (cow).
4. Alternate smoothly, without rushing.

**Breathing:** Exhale as you round, inhale as you open your chest.

**Avoid:** Moving only your neck. Locking your knees.

**Easier version:** Do it seated with your hands on your knees if standing is tiring.

**Safety:** Keep the movements within a pain-free range.

## Hip circles with wall support

Hips | Lower back | Obliques

**Position:** Standing sideways to the wall, one hand resting on it.

1. Feet hip-width apart, knees soft.
2. Draw big circles with your hips, as if you were using a hula hoop.
3. Do half the reps in one direction and half in the other.

**Breathing:** Natural, continuous breathing.

**Avoid:** Moving your shoulders along with your hips. Making jerky movements.

**Easier version:** Make the circles smaller.

**Safety:** Use the wall to keep your balance the whole time.

### Wall thoracic rotation

Upper spine | Obliques | Chest

**Position:** Standing sideways to the wall, an arm's length away, arms extended in front with palms together on the wall.

1. Keep your hips facing forward.
2. Open your outer arm in an arc, rotating your chest, until your hand touches the wall behind you (or as far as is comfortable).
3. Follow your hand with your eyes.
4. Come back slowly and repeat. Then switch sides.

**Breathing:** Inhale as you open, exhale as you return.

**Avoid:** Rotating your hips too. Forcing your shoulder at the end of the movement.

**Easier version:** Only open halfway.

**Safety:** The twist comes from your mid-back, not your lower back.

### Wall ankle mobility

Ankle | Calf | Shin (tibialis anterior)

**Position:** Standing, facing the wall, one foot forward about a hand-width from it.

1. Rest your hands on the wall.
2. Bring your front knee toward the wall without lifting your heel.
3. Come back and repeat. Then switch legs.

**Breathing:** Exhale as your knee moves toward the wall.

**Avoid:** Lifting your heel off the floor. Letting your knee cave inward.

**Easier version:** Move your foot closer to the wall.

**Safety:** Slow, controlled movement.

### Standing chest opener (wall swan)

Spinal extensors | Chest (stretch) | Shoulders

**Position:** Facing the wall, hands on it at chest height, one step back.

1. Slide your hands up the wall.
2. Gently bring your chest toward the wall, opening your upper back.
3. Come back by sliding your hands down.

**Breathing:** Inhale as you open, exhale as you return.

**Avoid:** Bending only at your lower back. Throwing your head back.

**Easier version:** Keep your hands lower.

**Safety:** The opening comes from your mid-back; your abs protect your lower back.

## Strength

### Bridge with feet on the wall

Gluteus maximus | Hamstrings | Abs

**Position:** Lying on your back, knees bent at 90°, feet on the wall hip-width apart.

1. Arms by your sides, palms down.
2. Press your feet into the wall and lift your hips until you form a line from shoulders to knees.
3. Hold for a second at the top, squeezing your glutes.
4. Lower down one vertebra at a time.

**Breathing:** Exhale as you lift, inhale as you lower.

**Avoid:** Arching your lower back at the top. Letting your knees drift apart.

**Easier version:** Lift only halfway and lower slowly.

**Safety:** Your weight stays on your shoulders, never on your neck.

### Marching bridge on the wall

Glutes | Hamstrings | Hip stabilizers

**Position:** Lying on your back, feet on the wall, knees at 90°.

1. Lift into a bridge and keep your hips up.
2. Lift one foot a few inches off the wall and put it back.
3. Alternate feet without letting your hips drop or rotate.
4. At the end of the reps, lower down slowly.

**Breathing:** Exhale as your foot leaves the wall, inhale as you put it back.

**Avoid:** Letting your hips sway. Holding your breath.

**Easier version:** Instead of lifting your foot, just take some weight off it.

**Safety:** If you get a cramp in the back of your thigh, lower down and stretch.

### Single-leg wall bridge

Gluteus maximus and medius | Hamstrings | Core

**Position:** Lying down, one foot on the wall (knee at 90°) and the other leg extended toward the ceiling.

1. Press the wall with your supporting foot and lift your hips.
2. Keep your pelvis level, without dropping toward the free leg.
3. Lower with control. Finish the reps and switch sides.

**Breathing:** Exhale as you lift, inhale as you lower.

**Avoid:** Rotating your hips. Pushing with your hands on the floor.

**Easier version:** Keep your free leg bent, knee pointing to the ceiling.

**Safety:** Only move on to this version once the two-foot bridge feels comfortable.

## Wall sit

Quadriceps | Glutes | Abs

**Position:** Back against the wall, feet forward and hip-width apart.

1. Slide your back down the wall until your knees are between 45° and 90°.
2. Knees in line with your second toe, not going far past your toes.
3. Hold the position with your whole back on the wall.
4. To come out, slide up slowly.

**Breathing:** Breathe steadily throughout the hold.

**Avoid:** Knees caving in. Resting your hands on your thighs.

**Easier version:** Go down less: a 30° to 45° angle already works well.

**Safety:** Stop if you feel pain in the front of your knee.

**Pain or limitations in your knees?** Swap for: Bridge with feet on the wall.

## Wall slide squat

Quadriceps | Glutes | Inner thighs

**Position:** Back against the wall, feet one step forward, hip-width apart.

1. Slide down the wall as if sitting down.
2. Go down as far as is comfortable (90° at most).
3. Push through the floor to come up, keeping your back on the wall.

**Breathing:** Inhale as you go down, exhale as you come up.

**Avoid:** Rising with your back only, without pushing through the floor. Heels lifting off the floor.

**Easier version:** Do a short drop, about a hand-width.

**Safety:** Keep your knees in line with your feet.

**Pain or limitations in your knees?** Swap for: Bridge with feet on the wall.

### Wall push-up

Chest | Triceps | Front deltoid | Core

**Position:** Facing the wall, an arm's length away, hands at shoulder height and width.

1. Form a straight line from head to heels, abs engaged.
2. Bend your elbows, bringing your chest toward the wall, elbows about 45° from your body.
3. Push the wall away to come back.

**Breathing:** Inhale as you lower in, exhale as you push.

**Avoid:** Poking your head forward. Letting your hips stick out back.

**Easier version:** Move your feet closer to the wall.

**Safety:** Keep your wrists in line with your elbows.

**Pain or limitations in your wrists?** Swap for: Incline wall plank.

### Standing hip abduction at the wall

Gluteus medius | Gluteus minimus | Hip stabilizers

**Position:** Standing sideways to the wall, supporting hand on it.

1. Lengthen your spine and keep your hips facing forward.
2. Lift your outer leg out to the side, foot pointing forward.
3. Lower without touching the floor and repeat. Then switch sides.

**Breathing:** Exhale as you lift your leg.

**Avoid:** Leaning your torso to the opposite side. Turning your foot upward.

**Easier version:** Lift less and touch your foot to the floor between reps.

**Safety:** The range is small: about 12 to 16 inches is plenty.

### Standing hip extension at the wall

Gluteus maximus | Hamstrings

**Position:** Facing the wall, hands on it at chest height, torso leaning slightly forward.

1. Engage your abs to keep your lower back stable.
2. Extend one leg straight back, squeezing your glute.
3. Come back slowly without putting your foot down. Then switch sides.

**Breathing:** Exhale as your leg goes back.

**Avoid:** Arching your lower back to lift your leg higher. Swinging your body.

**Easier version:** Bend the knee of the working leg.

**Safety:** Focus on control; your leg doesn't need to go high.

### Wall calf raises

Calves | Ankles | Feet

**Position:** Facing the wall, fingertips resting on it.

1. Feet parallel, hip-width apart.
2. Rise onto your toes as high as you can.
3. Lower slowly, for 3 counts.

**Breathing:** Exhale as you rise, inhale as you lower.

**Avoid:** Letting your ankles roll out. Dropping down fast.

**Easier version:** Only rise halfway.

**Safety:** Use the wall for balance only, not to push.

### Clamshell with feet on the wall

Gluteus medius | Hip rotators

**Position:** Lying on your side, back and hips aligned, knees bent and feet resting on the wall.

1. Rest your head on your bottom arm.
2. Keeping your feet together and on the wall, open your top knee like a clamshell.
3. Close slowly. Then switch sides.

**Breathing:** Exhale as you open, inhale as you close.

**Avoid:** Rolling your hips back. Taking your feet off the wall.

**Easier version:** Open your knee less.

**Safety:** Keep your hips stacked, one on top of the other, the whole time.

### Wall-supported split squat

Quadriceps | Glutes | Hamstrings

**Position:** Sideways to the wall, one hand on it, legs in a split stance (one forward, one back).

1. Torso upright, back heel lifted.
2. Lower by bending both knees, as if your back knee were going to touch the floor.
3. Push through your front foot to come up. Then switch sides.

**Breathing:** Inhale as you lower, exhale as you rise.

**Avoid:** Front knee caving in. Leaning your torso forward.

**Easier version:** Only lower a few inches.

**Safety:** Your front knee tracks in the direction of your foot.

**Pain or limitations in your knees?** Swap for: Standing hip extension at the wall.

## Core and abs

### Pelvic tilt with feet on the wall

Transverse abdominis | Rectus abdominis | Pelvic floor

**Position:** Lying on your back, hips close to the wall, knees bent at 90° and feet resting on the wall.

1. Start with a neutral spine: a small space between your lower back and the floor.
2. As you exhale, tuck your pelvis so your lower back touches the floor.
3. As you inhale, slowly return to neutral.
4. Keep your feet pressing lightly and steadily into the wall.

**Breathing:** Exhale as you tuck your pelvis, inhale as you return.

**Avoid:** Using your glutes to push instead of your abs. Holding your breath.

**Easier version:** Make the movement smaller: even a tiny tilt activates your deep core.

**Safety:** The movement should feel comfortable for your lower back; don't force the range.

### Incline wall plank

Transverse abdominis | Rectus abdominis | Shoulders | Glutes

**Position:** Forearms on the wall at shoulder height, feet away from it.

1. Walk your feet back until your body forms an inclined line.
2. Elbows under shoulders, abs tight and glutes engaged.
3. Hold the position without letting your lower back sag.

**Breathing:** Steady lateral breathing; don't hold your breath.

**Avoid:** Hips too high. Shrugged shoulders.

**Easier version:** Move your feet closer to the wall so you're more upright.

**Safety:** If you feel it in your lower back, move your feet closer and brace your abs.

### Incline wall mountain climber

Abs | Hip flexors | Shoulders

**Position:** Hands on the wall at chest height, body leaning, like a push-up.

1. Keep your body aligned and abs tight.
2. Bring one knee toward the wall and back.
3. Alternate legs at a controlled pace.

**Breathing:** Exhale with each knee that comes in.

**Avoid:** Arching your back. Speeding up and losing control.

**Easier version:** Go slowly, like an incline march.

**Safety:** Keep your wrists aligned and use the wall as firm support.

**Pain or limitations in your wrists?** Swap for: Wall-supported march.

### Dead bug pressing into the wall

Transverse abdominis | Rectus abdominis | Obliques

**Position:** Lying on your back, top of your head an arm's length from the wall, arms reaching back with hands pressing the wall, knees bent over your hips.

1. Press the wall with your hands to engage your abs and flatten your lower back to the floor.
2. Extend one leg forward, close to the floor, without lifting your lower back off the mat.
3. Bring your knee back over your hip and alternate legs.

**Breathing:** Exhale as you extend your leg, inhale as you bring it back.

**Avoid:** Lower back lifting off the floor. Releasing the pressure of your hands on the wall.

**Easier version:** Instead of extending your leg, just tap your foot to the floor with your knee bent.

**Safety:** Stop if your lower back arches; reduce the range.

### Prep hundred with feet on the wall

Rectus abdominis | Transverse abdominis | Neck flexors

**Position:** Lying down, knees at 90° and feet on the wall, arms by your sides.

1. Exhale and lift your head and shoulders, looking at your knees.
2. Lift your arms a few inches off the floor.
3. Make small pumping movements with your arms, up and down.
4. Lower your head at the end, without rushing.

**Breathing:** Inhale for 5 pumps, exhale for 5 pumps.

**Avoid:** Pulling on your neck. Lifting your lower back off the floor.

**Easier version:** Keep your head on the floor and only do the arm pumps.

**Safety:** If your neck feels uncomfortable, rest your head and keep going with your arms.

**Pain or limitations in your neck?** Swap for: Pelvic tilt with feet on the wall.

### Alternating toe taps (feet on the wall)

Lower abs | Hip flexors

**Position:** Lying down, knees at 90° and feet on the wall.

1. Slightly tuck your pelvis, keeping your lower back stable.
2. Take one foot off the wall and tap it to the floor, keeping your knee bent.
3. Return your foot to the wall and alternate.

**Breathing:** Exhale as your foot lowers, inhale as you bring it back.

**Avoid:** Arching your lower back as your foot lowers. Moving too fast.

**Easier version:** Only lower your foot halfway.

**Safety:** Your torso stays still; only your leg moves.

## Wall leg slides

Abs | Hip flexors | Hamstrings (stretch)

**Position:** Lying with your hips close to the wall and both legs extended up, resting on it.

1. Keep your lower back stable on the floor.
2. Slide one leg down the wall, bending your knee, as far as you can control.
3. Slide it back up and alternate.

**Breathing:** Exhale as you slide down, inhale as you slide up.

**Avoid:** Moving your hips away from the wall during the movement. Tensing your neck.

**Easier version:** Move your hips a little further from the wall.

**Safety:** Avoid if you have uncontrolled high blood pressure or medical advice against keeping your legs elevated.

## Leg circles with foot on the wall

Abs | Hip flexors and rotators

**Position:** Lying down, one foot on the wall with the knee at 90°, the other leg extended toward the ceiling.

1. Stabilize your hips and abs.
2. Draw small circles with your top leg, about the size of a plate.
3. Reverse direction halfway through. Then switch legs.

**Breathing:** Inhale for the first half of the circle, exhale for the second.

**Avoid:** Rocking your hips. Circles that are too big.

**Easier version:** Keep your top leg slightly bent.

**Safety:** Your hips stay heavy and still on the mat.

## Incline side plank on the wall

Obliques | Quadratus lumborum | Gluteus medius | Shoulders

**Position:** Sideways to the wall, forearm on it at shoulder height, feet away from the wall.

1. Elbow under shoulder, body leaning in a straight line.
2. Lift your hip sideways, away from the wall.
3. Hold the position. Then switch sides.

**Breathing:** Breathe steadily throughout the hold.

**Avoid:** Letting your hip drop toward the wall. Sinking into your shoulder.

**Easier version:** Move your feet closer to the wall.

**Safety:** Stop if you feel pain in your supporting shoulder.

**Pain or limitations in your shoulders?** Swap for: Clamshell with feet on the wall.

## Balance

### Wall-supported march

Hip flexors | Abs | Calves

**Position:** Standing, facing the wall, hands on it at chest height.

1. Keep your spine long and your abs lightly engaged.
2. Lift one knee to hip height and lower it.
3. Alternate legs at a steady pace, like marching in place.

**Breathing:** Natural breathing, don't hold your breath.

**Avoid:** Leaning your torso back. Stomping.

**Easier version:** Only lift your knee as high as is comfortable.

**Safety:** Keep your hands on the wall throughout the exercise.

### Single-leg balance with wall support

Ankle and hip stabilizers | Core

**Position:** Standing sideways to the wall, fingertips of one hand resting on it.

1. Lift one knee to hip height.
2. Keep your torso long and your eyes on a fixed point.
3. If you feel stable, take your hand off the wall for a few seconds. Then switch sides.

**Breathing:** Calm, continuous breathing.

**Avoid:** Leaning your torso. Locking your standing knee.

**Easier version:** Keep your hand on the wall and the toes of your free foot touching the floor.

**Safety:** Do it close to the wall and away from furniture with sharp corners.

## Stretching

### Wall chest stretch

Pectoralis major and minor | Front deltoid

**Position:** Standing sideways to the wall, forearm on it with your elbow at shoulder height.

1. Rest your palm and forearm on the wall.
2. Take a small step forward with the foot on the same side.
3. Gently turn your chest away until you feel a stretch in the front of your shoulder.
4. Hold, then switch sides.

**Breathing:** Breathe deeply and exhale slowly, relaxing your shoulder with each exhale.

**Avoid:** Lifting your shoulder. Turning too far and feeling pain instead of a stretch.

**Easier version:** Place your arm lower, below shoulder height.

**Safety:** A stretch is a gentle pulling sensation, never sharp pain.

### Legs up the wall

Hamstrings | Lower back | Full-body relaxation

**Position:** Lying on your back, hips close to the wall, legs extended up and resting on it.

1. Sit sideways to the wall and swivel your body, bringing your legs up.
2. Adjust the distance of your hips so your hamstrings feel comfortable.
3. Let your arms rest by your sides and close your eyes.

**Breathing:** Slow breathing, making each exhale a little longer.

**Avoid:** Forcing your hips against the wall if your hamstrings complain.

**Easier version:** Move your hips away from the wall or bend your knees slightly.

**Safety:** Avoid if you have glaucoma, uncontrolled high blood pressure or medical advice against it.

### Butterfly with legs on the wall

Inner thighs | Hips

**Position:** Lying with your legs up the wall.

1. Bend your knees, bringing the soles of your feet together.
2. Let your feet slide down the wall, opening your knees out to the sides.
3. Relax and let gravity stretch your inner thighs.

**Breathing:** Breathe deeply and exhale, relaxing your hips.

**Avoid:** Pushing your knees down with your hands.

**Easier version:** Move your hips away from the wall.

**Safety:** A gentle stretching sensation; never groin pain.

### Figure-4 stretch with foot on the wall

Glutes | Piriformis | Hip rotators

**Position:** Lying down, one foot on the wall with the knee at 90°.

1. Cross the ankle of your other leg over the bent knee, making a "4".
2. Move your hips closer to the wall to deepen, or further away to ease off.
3. Hold and switch sides.

**Breathing:** Long exhales to release your hips.

**Avoid:** Lifting your hips off the floor. Pushing your knee with your hand.

**Easier version:** Move your hips away from the wall.

**Safety:** With knee pain, rest your ankle closer to your thigh.

### Hamstring stretch with leg on the wall

Hamstrings | Calf

**Position:** Lying next to a door frame or wall corner, one leg extended up the wall and the other on the floor.

1. Rest your heel on the wall with your leg straight.
2. Your other leg stays extended on the floor (or bent, if you prefer).
3. Adjust the distance until you feel a comfortable stretch. Then switch sides.

**Breathing:** Slow, deep breathing.

**Avoid:** Lifting your hips off the floor. Locking your knee hard.

**Easier version:** Slightly bend the knee of the leg on the wall.

**Safety:** Never stretch to the point of pain or tingling.

### Wall-supported quad stretch

Quadriceps | Hip flexors

**Position:** Standing sideways to the wall, one hand on it.

1. Bend your outer knee and hold your ankle behind you.
2. Keep your knees close together and your pelvis slightly tucked.
3. Hold and switch sides.

**Breathing:** Calm breathing.

**Avoid:** Arching your lower back. Yanking your foot.

**Easier version:** Loop a towel around your ankle to reach it.

**Safety:** With knee pain, choose the side-lying version of the stretch.

**Pain or limitations in your knees?** Swap for: Hamstring stretch with leg on the wall.

### Wall calf stretch

Gastrocnemius | Soleus

**Position:** Facing the wall, hands on it, one leg forward and the other extended behind.

1. Keep your back heel on the floor and your leg straight.
2. Shift your hips forward until you feel the stretch in your calf.
3. Hold and switch sides.

**Breathing:** Slow breathing.

**Avoid:** Heel lifting off the floor. Back foot turned out.

**Easier version:** Shorten the distance between your feet.

**Safety:** Stretch progressively, without bouncing.

### Wall-supported side bend

Obliques | Latissimus dorsi | Quadratus lumborum

**Position:** Standing sideways to the wall, half an arm's length away.

1. Rest your inner hand on the wall.
2. Raise your outer arm overhead and lean your torso toward the wall.
3. Feel the side of your body stretch. Then switch sides.

**Breathing:** Inhale as you lengthen, exhale as you deepen the bend.

**Avoid:** Twisting your torso. Lifting your shoulder.

**Easier version:** Keep your outer hand on your waist.

**Safety:** Gentle movement, no bouncing.
