Express Workout Protocol

10-minute workouts for busy days, so you never lose momentum.

WALL PILATES · 21-DAY CHALLENGE

For the days when time isn't on your side

Some days it just doesn't happen. Meetings, kids, traffic, exhaustion. On those days, the worst thing is doing nothing: **10 minutes keeps your momentum** and the habit alive. The workouts below use only the wall and the floor.

The new exercises in this protocol

No-jump jumping jacks

Shoulders · Legs · Heart

Position: Standing, feet together and arms by your sides.

1. Step your right leg out to the side while raising both arms overhead.
2. Come back to center.
3. Repeat with your left leg.
4. Keep a pace that gets your breathing up without losing control.

Breathing: Breathe rhythmically, without holding your breath.

Avoid: Arching your lower back as your arms go up. Slamming your heel into the floor.

Easier version: Only raise your arms to shoulder height and go slower.

Safety: Great for getting your heart rate up with no impact on your knees.

Easy running in place

Legs · Glutes · Heart

Position: Standing, facing the wall, hands on it at chest height.

1. Lean your body slightly forward, hands on the wall.
2. Alternate bringing your knees up, like running in place.
3. Land on the balls of your feet and keep your abs tight.

Breathing: Breathe in through your nose and out through your mouth, in rhythm with your steps.

Avoid: Letting your hips drop back. Landing on your heels.

Easier version: Switch to a quick march, never lifting both feet off the floor at once.

Safety: With knee pain, do the marching version.

All the other exercises are explained step by step in the **Wall Pilates — 21-Day Challenge** guide.
